Say no To GMO

In news:

GEAC Approval to GM Mustard

Know about Mustard

Points in favour

- ❑ Nearly all the corn and soyabean grown in the **US and Canada** are GM crops
- ❑ Millennia before Gregor Mendel conducted his pea plant experiments in the 1850s, farmers knew that crossbreeding of plants, and animals, could produce certain desirable traits.
- ❑ Inter-species hybridisation and inter-generic hybridisation are also happening in nature. Ex Maize, Triticale,

Contd...

- ❑ developed by our own scientists
- ❑ Herbicide resistance is developed all over the world in soyabean, cotton, maize and many other crops. Crop with minimum tillage and less use of fuel
- ❑ No genetic erosion: NBPGR
- ❑ Benefit to farmers: Ex GM Cotton

Opposition

- ❑ Can have long term effects which may not be visible at the present moment
- ❑ According to Roderigues, GM crops contaminate nearby plants, endangering biodiversity
- ❑ Most of the countries that have higher cotton yields than India do not grow GM cotton

CHALLENGE TO TIES

- ❑ **HT: & Health->A scientific report from Argentina found a fourfold increase in birth defects and a threefold increase in childhood cancers in HT soya areas. Shockingly, the GEAC has conveniently omitted to have any herbicide-related studies.**
- ❑ **Gt-tolrant crop promotes constant exposure to a single herbicide — which eventually results in weeds becoming resistant**

QUESTION

Considering the less productivity of crops in India and imperative of increasing farmers income GM crops must be promoted.” Critically analyse.

Horror in Manchester

- Terror has aimed to unleash maximum **panic** and thereby create **divisions in societies**, challenge the **public's faith** in their institutions and **trigger ethnic, racial or religious tensions.**
- **IS returnee and challenge**

Employees of Lower courts

- ❑ A flawed rescue act**
- ❑ The commendation: Army**
- ❑ Decoding the Saharanpur clashes**
